

5-FITC

Article number: KF-YG0848

specification: 100mg/500mg/1g

Product description

5-Isothiocyanatofluorescein is the 5-isomer of isothiocyanatofluorescein. As a fluorescent probe, it can bind tissues and proteins; it is used as a label in fluorescent antibody staining procedures and protein and amino acid conjugation techniques.

Isothiocyanatofluorescein is a cyanide-containing derived from fluorescein. It is used in flow cytometry. It is a fluorescent probe that can bind to tissues and proteins.

It is also used as a label in the fluorescent antibody process.

Transportation and storage

Transport conditions: 2-8° C

Storage conditions: 2-8° C
